

Fat Dissolving Injections

Sculpt your shape. Target stubborn fat. No surgery.

At **Obsessive Beauty**, our Fat Dissolving Injections offer a safe, non-surgical solution to reduce small, stubborn pockets of fat that don't respond to diet or exercise. This advanced treatment contours and defines key areas of the face and body — helping you achieve a smoother, more sculpted silhouette with long-lasting results.

How It Works

The treatment uses **deoxycholic acid**, a naturally occurring compound that breaks down fat. When injected into targeted areas, it disrupts the fat cell walls, allowing the body to flush them away through the lymphatic system over several weeks. Once destroyed, the fat cells cannot return.

Common Treatment Areas

- Chin / Jawline
- Upper arms
- Stomach
- Hips / flanks
- Thighs
- Bra bulge / back fat
- Knees

What to Expect

- **Consultation:** We assess your suitability and goals
- **Treatment Time:** 30–60 minutes
- **Downtime:** Mild swelling or bruising for a few days
- **Results:** Visible after 3–6 weeks
- **Recommended Course:** 2–4 sessions spaced several weeks apart

All treatments are carried out by experienced aesthetic practitioners using premium, licensed products in a clean and welcoming environment. We prioritise client safety, comfort, and beautiful natural results.

 **Book your consultation today** and take the next step toward a more sculpted you.
