What Are Dermal Fillers?

Dermal fillers are injectable gels made from **hyaluronic acid**; a substance found naturally in the body that retains moisture and adds volume. They're used to restore youthful structure and improve symmetry across various facial areas — creating a fresher, more balanced look.

Common Treatment Areas

- Lips (enhancement or shape correction)
- Cheeks (volume and lift)
- Jawline & chin (definition and contouring)
- Nasolabial folds (lines from nose to mouth)
- Marionette lines (lines from mouth to chin)
- Tear troughs (under-eye hollowing)
